ProductEazy

COMPANY BROCHURE

Solutioning at scale.

From idea to production, with one partner.

ProductEazy delivers end-to-end technology solutions across Digital Public Infrastructure, open-source platforms, distributed systems and AI. Our partner network covers the full software stack, deployment and operations.

What we provide

Deep expertise built over decades in open source, infrastructure and population-scale digital systems.

01 INFRASTRUCTURE

Distributed Systems & Storage

Consultation on distributed systems, filesystems and storage layers, from architecture reviews to production hardening at scale.

02 AI

Applied AI Solutions

AI fitted to your product requirement, not the other way around. From data pipelines to deployed models, across manufacturing, industry and enterprise workflows.

03 ENTERPRISE

ERP & Ticketing Systems

Deployment, customization and integration of ERP and ticketing platforms, connecting operations, support and business processes into one stack.

04 ENTERPRISE

Workforce Management

Workforce management software for scheduling, attendance, field-force tracking and payroll integrations, tailored to your operations.

05 ENERGY

Power & Energy Software

Software for the power and energy sector: monitoring, optimization and integration with modern digital infrastructure.

06 END-TO-END

Infrastructure Solutioning

Full-stack infrastructure design and deployment across cloud, on-premise and hybrid, covering software, operations and lifecycle management.

07 DPI

Digital Public Infrastructure

Design, integration and rollout of DPI stacks (**Beckn, ONEST, BlueDot, NFH and Finternet**) for open networks in commerce, education, health and finance.

08 OPEN SOURCE

Open Source Strategy & Engineering

Leadership experience from the Linux Foundation and Red Hat ecosystems. Open-source adoption, contribution strategy, community building and enterprise-grade OSS engineering.

One door, full solution.

Come to us with a problem. Together with our product partners, we deliver the complete solution: consultation, architecture, software stack, deployment and support.

01

Consult

Understand your problem, constraints and scale. Define the right architecture and stack.

02

Solution

Assemble the solution from proven products and open-source components, ours and our partners'.

03

Build & Integrate

Engineering, integration and customization across every layer of the software stack.

04

Deploy & Support

Production deployment, in the cloud or on-premise, with ongoing operations and support.

ABOUT

Built by people who have shipped at scale.

ProductEazy is led by practitioners with decades of hands-on experience in open source, infrastructure and population-scale digital systems. We have built and operated these systems, not just advised on them.

OPEN SOURCE

Linux Foundation & Red Hat ecosystems

Leadership experience in open-source communities and enterprise open-source engineering, from contribution strategy to production-grade platforms.

DPI

Population-scale digital infrastructure

Hands-on work with open networks and public digital infrastructure, including Beckn, ONEST, BlueDot, NFH and Finternet.

SYSTEMS

Distributed systems & storage

Deep background in filesystems, storage and distributed systems: architecture, performance and hardening for production.

AI

Applied AI

Practical delivery of AI solutions fitted to real product requirements.

Need people, not just a product?

We place experienced practitioners with your team for consultation, reviews, and short or long engagements in any area we cover. Work with one expert for an afternoon, or build out a squad for a program.

Advisory & consultation

Architecture reviews, strategy sessions and second opinions from people who have shipped at scale.

Embedded specialists

Outsourced engineers and architects who join your team for a defined scope and timeline.

Project squads

A curated team across disciplines, led by us and accountable for an outcome.

PARTNERS

Product partners

We partner with focused product companies, so every engagement delivers a complete, production-ready experience.

Jnanik.AI

AI products and applied intelligence solutions.

jnanikai.com

SolveEasy

Software solutions and product engineering.

solveeasy.in

Evolugics

Transforming ideas into innovation.

evolugics.com

Aritha

Technology services in agile consulting, telecom and software development.
